RE: Administrative Modification to INDOT Long Range Transportation Plan

Dear Sir:

In reviewing the development process of the 2010 update of the INDOT Long Range Plan relative to the I-69 Section 4 project we have identified the need for a administrative modification to the current 2007 version of the transportation plan to move the I-69 project from the 2016 to 2020 time frame using innovative finance to the 2011 to 2015 time period using traditional funding. This administrative modification would involve Long Range Plan projects 369, 370, and 371 in the Vincennes District and Long Range Plan projects 305 and 306 in the Seymour District. The development of the 2010 update of the INDOT Long Range Plan has encountered delays which have pushed back the plan adoption date to the point at which the administrative modification to the current plan is believed necessary. The proposed modification will correct this situation. We request FHWA concurrence with this revision as an administrative modification.

Sincerely,

Roy Nunnally, Director
Division of Long Range Planning Traffic Modeling and Counting
Indiana Department of Transportation
